- Incorporated feedback and refined the analysis.

EDUCATION

University of KwaZulu Natal

KZN, Durban

Bachelor's of Science, Computer Science and IT

2021 - 2023

PROJECTS

- **Desktop Application for Brite Sparx Cafe :** My team and I built a desktop system for Brite Sparx Cafe. It helps staff manage orders, update statuses, and handle customer profiles. The system also tracks deliveries, allowing real-time updates from the delivery guys. Menu and category management is also made easy with our solution.
- **Website for Brite Sparx Cafe :** We created a website for Brite Sparx Cafe. Customers can make accounts, order food, and track their orders. Staff and managers can manage menus, categories, and view reports through the site. It's a simple and user-friendly platform for both customers and cafe management.
- **Portfolio Website :** I handcrafted my personal portfolio website as a platform to display past projects, work experience, skills and provide a snapshot for potential employers to evaluate my abilities and potential fit for their teams.

SKILLS AND INTERESTS

- **Languages :** Zulu, English
- **Technical Skills :** HTML/CSS, JavaScript, C#, Java, MS SQL Server
